NOTICE

A notice of intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

Kennecott Utah Copper Corporation

Location: 9600 West 2100 South, Magna, UT 84044

Project Description: Kennecott Utah Copper Corporation (KUCC) has requested to modify the fuel requirements in the current Power Plant Approval Order (AO) DAQE-AN0572013-04. KUCC has requested that the units for the natural gas limit be changed from million (MM) cubic feet per day to MMBtu per day and the units of coal limit be changed from tons per day to MMBtu per day. These unit changes will not affect the emission rates. KUCC had requested that the implied testing of Boilers No. 1,2,3 and 4 under the natural gas (NG) condition be clarified. KUCC requested permission that when back half source testing is required, that they be allowed to use historical data. The Salt Lake County PM₁₀ State Implementation Plan requires that back half condensibles to be tested. Therefore, KUCC will be required to perform this testing requirement.

Salt Lake County is a non-attainment area of the National Ambient Air Quality Standards (NAAQS) for PM₁₀ and SO₂, and is a maintenance area for ozone. Title V of the 1990 Clean Air Act applies to this source. The requirements for the Title V shall be followed until operating permit for this source has been amended.

There will be no change in the emission limits or rates from this AO modification.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 150 North 1950 West, Salt Lake City, UT 84114-4820. Written Comments received by the Division at this same address on or before March 23, 2005, will be considered in making the final decision on the approval/disapproval of the proposed approval order. Email comments will also be accepted at nmeli@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-4, UAC.

Date of Notice: February 21, 2005
